# Why Choose Paper Tubes

When it comes to packaging solutions, paper tubes stand out as a versatile and eco-friendly choice.

**Sustainability:** Paper tubes are inherently eco-friendly, made of 100% renewable paper and can be 100% recyclable or compostable.

**Versatility:** Paper tubes are incredibly versatile and can be customized in various ways to show off your products.

**Product Protection:** Our paper tubes are designed with good barrier to provide optimal protection

**Presentation:** Beyond protection, paper tubes offer an elegant and aesthetically pleasing presentation.

# Why Us

Established in 2012, EarthyCores specialized in design, manufacture and supply of paper tubes, Kraft paper tubes, rigid gift boxes and other eco-friendly paper products for a range of consumer retail, industrial, medical and cosmetic markets. In the aim of providing a more sustainable solution to the PaperTubes, EarthyCores is committed to the environment.

Our packaging is eco-friendly, biodegradable and sustainable. All of the recycled fiber paper that makes up our tubes is 100% recycled with up to 95% post-consumer content (consumer content percentages can vary based on suppliers). We also offer environmentally friendly labeling options that can be created with vegetable or soy inks.

We apply a variety of finishes and styles to our paper tubes, which will add value to your brand and help your products stand out from your competition on the retail shelf.

## Short Lead Time

Mass production lead time is 20 days, depending on customization and order complexity.

## Sustainable

Recyclable and Compostable material, soy ink for printing.

## Lower MOQ

We have a MOQ of 1,000. Easier for small business to start rolling.

## Free Samples

For Coffee & Tea

# Your Coffee Beans Need More Than Just Bags

A fresh and unique way to pack your coffee

## Here are some of the top reasons

Paper tubes are 100% recyclable, making them a sustainable and eco-friendly option for packaging.

Paper tubes can also offer excellent protection for your coffee beans, keeping them fresh and tasting great.

Custom printing on paper tubes allows you to create a unique and eye-catching design that will stand out on store shelves. Unlike plastic bags which you have to pay a high fee of plate charge, and high MOQ of each design, there is no plate cost for paper tubes of various designs and much lower MOQ than bags.

No need to worry about the degassing valve, we can add valve to the paper-tubes just as what we do to bags.

For Beauty & Care

# Your Brand Deserves The Best Packaging

Beauty meets Tubes

## Why choose paper tube as brand packaging?

Transform the way you present your cosmetics and beauty products, such as lip stick, perfume, body care, etc. It is a great choice for all these beauty care products. It's lightweight, eco-friendly, and cost-effective - meaning you can save money and reduce your carbon footprint without compromising on quality.

Plus, paper tube packaging is visually appealing, allowing your brand to stand out from the competition. And best of all, it's highly customizable, so you can design and produce paper tubes that perfectly fit your brand image.

**For Food**

## Where Paper tubes meet freshness and quality

**One good package, one new experience**

### Why Choose Food Paper Tubes?

Our Paper Tubes are designed to preserve the freshness and quality of your food products, whether you are packaging snacks, coffees, or proteins, our eco-friendly and food-grade paper tubes will work perfectly for all.

A portion of all proceeds goes towards planting trees in areas depleted of forests to offset the emissions from making paper tubes.

Along with preservation, sustainability, the customization is also without limit. You can choose to Foil stamp, UV Varnish, Matte finish, Soft Touch, etc. Your food products will just stand out without question.

**Child Resistant**

## Easy Way To Ensure The Safety Of Your Loved Ones

**Child Resistant Paper Tubes are designed to keep children away from items that could be hazardous or dangerous.**

### Why Choose Child Resistant Paper Tubes?

Child-resistant paper tubes are a safe and cost-effective way to pack and store products like oils, supplements, snacks, and medicines. These tubes have been designed to meet the highest standards of child safety packaging, making them ideal for families with small children.

They are also environmentally friendly, as they are made from recyclable paper materials. All in all, child-resistant paper tubes provide a reliable solution that you can trust.

## Kraft Tubes

# Offer A Unique And Eye-Catching Way To Package Your Products

We do our best to provide a sustainable solution that meets your needs.

## Why Choose Kraft Paper Tubes?

Kraft Paper Tubes are the perfect product for your business needs. They offer a lightweight and durable solution for storing or protecting items. Unlike other materials, Kraft Paper Tubes feature a strong interior that won't tear or break down over time.

Additionally, they have great shape memory, meaning your tube will keep its form even after multiple uses—making it perfect for use in a variety of settings.

Finally, they're also eco-friendly and compostable, making them a great choice for businesses looking to go green!

## For Red wines

# Elegance Meets Preservation

Elevate your red wine packaging with EarthyCores' paper tubes. Crafted with sophistication and sustainability in mind, our paper tubes offer a unique blend of elegance and preservation.

## For Proteins and Supplements

# Nutritional Excellences Deserves Quality Packaging

For protein powders, supplements, and nutritional products, EarthyCores provides packaging that ensures products freshness and purity. Our paper tubes offer an eco-conscious solution to showcase your commitment to health and well-being. Discover our tamper-evident seals for added consumer trust.

## Sustainability

# 100% Recyclable Paper Tubes Your Brand can be Proud of

### Soy inks, biodegradable plastic, FSC certified paper make EarthyCores.

A small step by switching from plastic to paper tubes, can have a big impact. Plastic is one of the most significant environmental problems facing the world today. Every year, millions of tons of plastic are produced, and a large percentage of it ends up in our oceans and landfills which takes hundred of years to disappear.

Can be Zero Waste to our Earth.

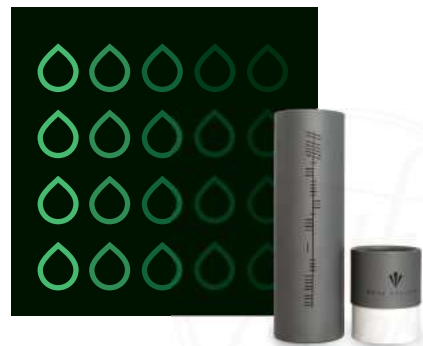

## Soy Ink

Soy Ink is a kind of ink made from soy beans which are a 100% renewable resource.

Soy ink is a kind of ink made from soybeans which are a 100% renewable resource. To make soy ink, soybean oil is slightly refined and then blended with pigments, resins and waxes.

There are many environmental benefits to using soy inks. Soy inks are low in VOCs (volatile organic compounds) and their usage can help reduce emissions causing air pollution. As soybeans are growing they temporarily remove damaging carbon dioxide from the atmosphere. Soy ink is also a helpful component in paper recycling because the soy ink can be removed more easily than regular ink from paper during the de-inking process.

## Biodegradable Plastic

The paper is sourced from a well-managed forest, it can be just as eco-friendly.

Why biodegradable plastic is needed for PaperTubes?

If you're using tubes as secondary packaging and want to reduce your environmental impact, pure uncoated kraft or white paper with soy ink printing and varnish is good enough.

However when you need primary packaging that will have direct contact with food or packaging that will be used and stored in a moisture-prone environment, it's almost impossible to completely eliminate plastic from outer lamination or the inner liner that ensures shelf life and oil-resistance. To steer you towards the most eco-conscious option, Biodegradable plastic is applied.

## FSC Certified Paper

Biodegradable plastic is required to ensure shelf life and oil-resistance when necessary.

What makes paper sustainable? Like many other green buzzwords including organic and natural, the word sustainable can be vague. With its FSC-certified label, the Forest Stewardship Council defines a strict set of standards that paper products must meet in order to prove that they are truly environmentally and socially responsible.

FSC stands for Forest Stewardship Council, an organization that works to promote the practice of sustainable forestry worldwide. FSC-certified paper is different from recycled paper, as it's typically composed of virgin tree fibers rather than pre- or post-consumer recycled materials (although recycled paper is sometimes also FSC-certified). But when the wood pulp used to make this paper is sourced from a well-managed forest, it can be just as eco-friendly.
