

Product Data Sheet

Product Name: para-menthane

Synonyms: 1-isopropyl-4-Methyl Cyclohexane; p-Menthane;

CAS No.: 99-82-1

Molecular Formula: C₁₀H₂₀

Molecular weight: 140.27

Molecular structure:

Application: Used in the manufacture of organic peroxide initiators, precursor raw materials for p-menthane hydroperoxide; or used as a solvent and other chemical intermediates.

Specifications:

Index	Target Value		
Physical Form	Colorless and Clear liquid		
Hazen	≤30		
p-menthane, %	≥98	≥95	≥92
Specific gravity (D ₄ ²⁰)	0.790-0.810		
Refractive Index (n _D ²⁰)	1.4300 - 1.4500		
Iodine value	≤0.5		

Package: 165KGS N.W. in 210L Plastic drum or 800KGS N.W. in 1000L IBC and iso tank containers

Transport Information:

Proper shipping name: Terpene hydrocarbons, n.o.s.

HS Code: 2902199090, IMO Class:3, PG III, UN No.: 2319
